

TL103

High Precision CC/CV Primary-Side PWM Power Switch

2. Products Information

2.1 Pin configuration

SOP7 Package

Fig.2. TL103 Pin Configuration

Pin Name	I/O	Description
VDD	Power Input	Power Supply
FB	Analog Input	The Voltage feedback from auxiliary winding. Connected to resistor divider from auxiliary winding reflecting output voltage.
CS	Analog Input	Current sense input. Connected to primary current sensing resistor.
C	Output	Collector of internal bipolar junction transistor(BJT).
GND	Ground	Ground
